Genesis Prosthetic Arts

**Prosthetics
and Anaplastology
by David Van Auker, MA, CP, CCA**

**See the difference a quality
prosthetic restoration can make!**

Genesis Prosthetic Arts is the art and science of prosthetics, inspired by Leonardo Da Vinci of the Renaissance, who himself was an artist and a scientist. It is a full service prosthetic facility fitting both highly functional and cosmetic devices for most amputations. We are board certified in clinical anaplastology and traditional prosthetics. We are certified through ABC and the BCCA. All the alternatives are available under one roof. The patient doesn't have to wonder if they are being offered ALL of the possibilities for their care. It's here.

*A comprehensive
clinic providing
cutting edge appearance
combined with function
for unusual patients*

Looks aren't everything... But maybe they are to a particular patient! Genesis is geared to working with these special cases. These are the patients a prosthetist may encounter once every couple of years. Genesis takes the prosthesis from start to finish to ensure the optimum outcome. All phases of the prosthesis are done in house. We are not a central fabrication service or a middle man. We stay on the cutting edge of technology providing some of the most innovative solutions for these unique cases!

No stock gloves here.... Everything is built individually. Our prostheses are fit from initial casting to final brush stroke with a fully customized and personal focus. Each prosthesis is a one-of-a-kind, just like the patients we serve.
