Genesis Prosthetic Arts

*Partial Hand Prosthetics
 by David Van Auker, MA, CP, CCA*

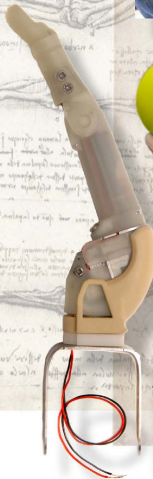

**See the difference a quality
 prosthetic restoration can make
 in form and function!**

Genesis Prosthetic Arts is a full service prosthetic facility fitting both highly functional and cosmetic devices for partial hand amputations. We are certified to fit custom silicone restorations or myoelectric powered hands. All the alternatives are available under one roof. The patient doesn't have to wonder if they are being offered ALL of the possibilities for their care. It's here. But look around. The more a patient looks around, the better Genesis looks!!

An alternative to your current prosthesis with cutting edge appearance or function

Looks aren't everything... But maybe they are to *you!*
There is a choice! Sometimes patients can even have both looks and function!
And Genesis gives all of them to you.
And we stay on the cutting edge of technology providing some of the most comprehensive services found ANYWHERE.. Just look around and see the difference.

No stock gloves here (unless they are requested). Too many patients are offered a few stock monochrome gloves to chose from that don't really match, and stain easily. Our prostheses are fit from initial casting to final brush stroke with a fully customized and personal focus. Each prosthesis is a one-of-a-kind, just like our patients.

The development of the *l-digit* opens up a world of new possibilities for the partial hand patient!
